

Yonzo

Automotives PVT LTD

Connecting Riders Worldwide

ABOUT COMPANY

We specialize in producing reliable and durable cables for motorcycles, scooters, three-wheelers, and commercial vehicles. Over the years, we have proudly supplied our products to numerous exporters and distributors across India, earning a strong reputation for quality, consistency, and trust.

With advanced production facilities, precise engineering systems, and stringent quality control processes, every Yonzo cable is crafted to meet global standards of safety and performance. Our focus on innovation, technical accuracy, and timely delivery has positioned us as a preferred partner for aftermarket distributors.

Now, with our deep industry experience and proven product reliability, Yonzo Automotives is expanding into international markets, bringing world-class control cable solutions to customers worldwide.

Our Vision

To become a globally trusted and recognized manufacturer of aftermarket automotive control cables by delivering superior quality, innovation, and performance that consistently enhances vehicle reliability and the overall driving experience.

Our Mission

Our mission is to manufacture high-quality, reliable automotive control cables through advanced engineering, rigorous quality assurance, and continuous innovation. We aim to deliver exceptional value, strengthen long-term partnerships with importers and distributors, support global and domestic markets, and ensure every product contributes to safety, efficiency, and customer satisfaction.

Key Features of Yonzo Automotives Products

Wide Range of Automotive Cables

Includes accelerator cables, brake cables, choke cables, gear cables, clutch cables, seat lock cables, speedometer cables, and custom cables designed for various vehicle types.

Extensive Vehicle Compatibility

Products suitable for motorcycles, scooters, three-wheelers, e-rickshaws, electric bikes, and commercial vehicles.

Specialised Cable Types

Both standard and custom engineered control cables are available to meet specific vehicle requirements.

Durable Construction

Automotive control cables are engineered with robust materials to handle regular vehicle operations like acceleration, braking, and gear shifting. (General industry cable durability relevance)

Technical Specifications

High-tensile steel inner wire with durable PVC/HDPE casing, pre-lubricated for smooth performance and OEM-accurate fitment.

Inner Wire: Manufactured using high-tensile steel for superior strength

Outer Casing: Premium quality PVC / HDPE for enhanced flexibility

Lubrication: Pre-lubricated for smooth, low-friction operation and longer service life

Outer Casing: Premium quality PVC / HDPE for enhanced flexibility

Fitment: OEM-matching length ensuring perfect fit and hassle-free installation

Packaging: Securely packed in individual poly packs to prevent damage.

Our Range Of Cables

We offer a complete range of high-quality automotive control cables designed for smooth operation, reliable performance, and long service life across multiple vehicle applications.

- Accelerator Cables
- Brake Cables
- Choke Cables
- Gear Cables
- Clutch Cables
- Pull-Push Cables
- Seat Lock Cables
- Turn-to-Lock Cables
- Engine Stop Cables
- Speedometer Cables
- Customised Cables

Product Range Overview

Accelerator Cables

Designed to deliver smooth throttle response, our accelerator cables ensure precise control, reduced friction, and long-lasting performance under all riding conditions.

Clutch Cables

Manufactured for consistent clutch operation, these cables provide effortless engagement, durability, and reliable performance for everyday and heavy usage.

Speedometer Cables

Engineered for accurate speed indication, our speedometer cables offer smooth rotation, minimal wear, and dependable functionality over extended use.

Brake Cables

Built to ensure responsive braking, these cables are crafted for strength, safety, and consistent braking performance across various riding conditions.

Choke Cables

Developed for easy cold starts, our choke cables provide smooth operation, reliable control, and durability for long-term use.

Why Our Cables

Our Cables

- Precision-engineered low-friction inner wire for smooth throttle response
- Heavy-duty outer casing for added strength and protection
- Smooth and consistent operation in all riding conditions
- Designed for long service life with minimal maintenance
- Accurate and reliable fitting as per OEM standards

Suitable For

- Daily commuting motorcycles
- Taxi and commercial-use bikes
- Delivery and fleet motorcycles
- Challenging and rough road conditions

Vehicle Applications

Our automotive control cables and components are compatible with a wide range of popular two-wheeler brands, including:

- **Honda**
- **Yamaha**
- **Suzuki**
- **Bajaj**
- **TVS**
- **Hero**
- **& Other Leading Brands**

Our products are designed to ensure smooth operation, durability, and reliable performance across multiple motorcycle and scooter models.

Embracing Technology & Innovation

We ensure that all our products are packed with utmost care to meet international shipping and export standards, ensuring safety and quality at every stage of transit.

Packaging Standards & Support

Export-Grade Packaging

Export-standard materials for safe and damage-free transit.

Private Labeling

Custom branding and private labeling as per requirement.

Secure Shipping

Strong packaging for long-distance and international delivery.

Brand Partnerships

We are actively looking to collaborate with importers and distributors who are interested in building a strong and reliable aftermarket brand in their respective countries

Consistent OEM-Quality Production

Reliable manufacturing with strict quality standards for long-term brand trust.

Private Labeling & Brand Support

Customized branding, packaging, and product support to strengthen your market presence.

Stable Pricing & MOQ Planning

Transparent pricing structure with well-planned minimum order quantities for business scalability.

Exclusive Territory Discussions

Volume-based territory exclusivity options to support long-term partnerships.
